

**CABBANI<sup>®</sup>**  
custom made parquet

This Brochure will take you into the world of Cabbani. This is a world where wood plays the leading role. Discover why nothing beats the charm and character of a wooden floor. Indeed, parquet is timeless while being more relevant than ever before.

But because even the best photos sometimes fall short, we would like to invite you to a Cabbani distribution point to see and feel our parquet for real and to breathe in the aroma of the wood.

With this brochure, we hope to inspire you in your search for a durable floor with timeless beauty.

# MADE IN FRANCE WITH LOVE

Thirty-five years ago, Gérard Cabannes gave shape to his dream. He began a veneer processing company surrounded by the inspiring vineyards of the Bordeaux region. He constantly built on his successes and with the second generation, Benoît and Julien Cabannes, this led to the production of laminated parquet in 2000.

Their brainchild, the parquet system à la carte, with which the customer can assemble a wooden floor as desired, turned out to be another bull's eye. Quality and flexibility took the company to the top of the upmarket wooden flooring segment in no time.

After a professional relationship for over 25 years, and in view of the complementarity of the production sites on both sides, Benoît and Julien decided to make the partnership more permanent and their company was integrated into the Decospan group. New opportunities arose. Since January 2016 their parquet has been available in specialised parquet shops under the CABBANI name. Under this brand name, we continue to invest in the production of this high quality custom French parquet to serve customers worldwide.

# A SUSTAINABLE CHOICE

Decospan gives respect for nature a central place in its policy. This conviction was embodied in the Pure Wood Charter. Suppliers are asked to sign and adhere to this charter. It gives a clear signal to both customers and suppliers that engagement in preserving nature is an important part of our strategy.

## OXYGEN FOR THE ENVIRONMENT

Trees and forests are the green lungs of our planet. They take up CO<sub>2</sub> from the atmosphere and produce oxygen in the process. Relative to other building materials, wood can lead to a significant reduction of the amount of carbon dioxide. Every cubic metre of wood is equal to 2 tons less CO<sub>2</sub> in the atmosphere.

## CARE FOR THE FUTURE

Wood is a sustainable and optimally recyclable resource. At the end of its lifecycle, it is perfect to reuse in new products and applications. In this way, a large volume of carbon is stored in the wood for a long time. Reusing wood also means that no other, often non-renewable, materials need to be used.

## ATTENTION FOR FORESTRY

Responsible forest management with replanting and controlled felling maintains the total amount of trees and forests. This prevents this valuable resource from being exhausted prematurely and keeps our environment in balance. With this and other measures, we can confidently say that choosing wood means choosing the future while promoting a sustainable economy.

## HEALTHY INTERIOR CLIMATE

In the meantime, a Cabbani parquet floor improves the air quality in your home. Indeed, all our efforts during the production process focus on making your house into a healthy home. We achieve this by only using harmless water stains and adhesives that are free of volatile organic compounds (VOCs). Our lacquers also contain a minimum of harmful solvents. This gave us an A+ label, which stands for the best residential air quality.

PEFC™ stands out by taking into account the specific characteristics and legislation of every country. PEFC™ aims to prove that is it possible to combine forest conservation with rising consumer demand for wood.

FSC® is an international, independent, non-governmental non-profit organisation. It was established by forest owners, the wood sector, social movements and environmental organisations. FSC® promotes responsible forest management all over the world.

Available on request for projects from 500 m<sup>2</sup>.

# Natural

COLLECTION 02

## Compose your own dream parquet

Cabbani stands out for its unique 'à la carte system'. By playing with and varying a number of parameters, the end result is guaranteed to meet all your requirements and expectations.

Easily put your personal parquet by choosing from 5 colour collections, 26 individual colours, 3 board dimensions, 3 different top layer thicknesses, 2 types of cores, 2 finishes (varnish or oil) and 2 grades (rustic or select).

Learn about various options starting from page 36.

DESIGNER 19P - Natural Rustic

DESIGNER 19P - Pomerol Rustic

# Pomerol

COLLECTION 05

The reactive stains that we use at Cabbani are exceptionally beautiful and give the wood a weathered and aged look. Subtly nuanced differences in the colour pattern also contribute to this natural effect. These nuance differences result from the varying quantities of tannin that one tree species can contain, depending on the region or even the location in the forest. Tone and reaction differences are therefore completely normal and make our lye-treated floors unique.

COLLECTION 04

The specific circumstances and applications are very important to determine the right choice of parquet. Will it be travelled intensively? Will it be used with or without underfloor heating? Will it be laid in an apartment or a single-family residence? Your distributor or flooring professional will be happy to help you find the solution that meets your needs.

DESIGNER 14H - Graves Rustic

# Graves

COLLECTION 05

Did you know that Cabbani parquet is produced in the same region as the famous wines Saint-Emilion, Puisseguin, Pomerol... a stone's throw from Cognac? Cabbani also guarantees 100% French quality.

# Milk

COLLECTION 01

PREMIER 14H - Milk Select

# Sémillon

COLLECTION 05

Cabbani parquet is perfect for use in combination with underfloor heating, as long as the floor temperature does not rise above 27°C (80°F). Because there are different underfloor heating systems, we recommend following the manufacturer's instructions. Ask our distributors for more information. Specific laying instructions can also be found on [www.cabbani.com/en/downloads](http://www.cabbani.com/en/downloads).

DESIGNER 19H - Sémillon Rustic

DESIGNER 10H - Pure Rustic

# Pure

COLLECTION 02

Like any wooden floor, Cabbani floors are also susceptible to scratches and dents. But it is precisely this lived-in aspect that provides authentic character. If you still prefer to avoid this, plenty of solutions are available: keeping the floor clean, a doormat, felt pads under furniture legs, protective mats under chairs with wheels...

If necessary, your parquet can also easily be repaired locally or freshened up using our specially developed maintenance products.

DESIGNER 19H - Bouchalès Rustic

Wood is a natural, humidity-sensitive material. Warping can sometimes occur under the influence of excess moisture or extremely dry air depending on the climate in your region or the conditions in your residence. To avoid possible problems, we recommend monitoring the air humidity using a hygrometer and maintaining the level with a humidifier or dehumidifier. More information about this is available on our website and in our installation instructions.

COLLECTION 02

The warm character of your wooden floor is closely connected with its maintenance. Indeed, maintaining wooden flooring not only keeps it clean, but also has a nourishing and protective function. We supply the necessary maintenance products that are specifically designed for our floors, whether varnished or oiled. More information about this is given on page 49.

# Boreal

COLLECTION 04

We have all the necessary accessories to finish your Cabbani parquet perfectly. For instance, we have designed a very beautiful and convenient 3-in-1 skirting board for all designs from our range. The height of this veneer skirting board can be adjusted according to your taste or application. Furthermore, 3-in-1 profiles are also available (end, adjustment and transitional profiles) as well as matching stair tread nosing. More information is given on pages 47-48.

ELITE 14H - Boreal Rustic

# Diamond

COLLECTION 04

ELITE 14P - Diamond Rustic

The size of the space determines the size of the boards. For smaller spaces, it is best to choose narrow, short boards. In large spaces, broad, long boards come more into their own. The orientation of the boards also has an effect. Long boards installed along the length of a room make the room look even longer.

~~/SIMPLY~~  
CHOOSE THE  
FLOOR THAT  
SUITS YOU IN  
5 STEPS~~/~~

The Cabbani collection stands out through its unique 'A la carte system'. The end result can meet your expectations by varying and playing with some parameters. In the next pages we'll explain the 5 steps you need to take to achieve your dreamfloor.

**STEP 1: CHOOSE THE COLOUR**

The Cabbani collection has 26 colours divided into 5 collections  
see pages 38-41

**STEP 2: CHOOSE THE SIZE**

Choice between 3 board sizes: Premier, Elite or Designer  
see page 42

**STEP 3: CHOOSE THE STYLE**

A clean "Select" or more characterful "Rustic"  
see page 43

**STEP 4: CHOOSE THE THICKNESS**

Choice between 3 top layers: 2, 3.2 or 5.5 mm  
see page 44

**STEP 5: CHOOSE THE CORE**

Choice between 2 cores: HDF or Birch Plywood  
see page 45

## STEP 1: CHOOSE THE COLOUR

The Cabbani collection has 26 colours divided into 5 collections. Every collection has its own specific characteristics and colour variants. The fact that wood is a natural product which can have slight colour variations makes the whole more interesting, natural and whimsical.

### Collection 01

7 trendy, timeless colours with **LACQUERED** finish.  
Available in select and rustic

**European** select / rustic ✨

**Ivory** select / rustic ✨

**Umber** select / rustic ✨

#### LACQUERED FINISH

A varnish finish requires less maintenance and provides better long-term protection. The varnish layer completely seals the pores of the wood. Every Cabbani floor is provided with 8 coats of UV-cured water-based lacquer. This provides a low-maintenance floor and optimal protection against wear, scratching and stains.

**Milk** select / rustic ✨

**Desert** select / rustic ✨

**Antique** select / rustic ✨

**Manhattan** select / rustic ✨

## Collection 02

4 trendy timeless colours with **OILED** finish.  
Available in select and rustic

**Natural** select / rustic ∅

**Pure** select / rustic ∅

**Polar** select / rustic ∅

**Shade** select / rustic ∅

### OILED FINISH

Finishing with oil gives the wood a more natural character, a beautiful patina and an authentic look. Soaping the floor regularly gives it an extra protective layer that makes it more resistant against staining. A yearly clean with a suitable intensive cleaner and applying a maintenance oil keeps the saturation of the wood optimal.

## Collection 03

3 colours **with ceruse effect** and with a **LACQUERED** finish.

Available in rustic

Himalaya rustic ✕

Alps rustic ✕

Stone rustic ✕

## Collection 04

8 attractive colours that result from a **reaction of stain with the tannin in the oak**. Provided with an **OILED** finish.

Available in rustic

Boreal rustic ◊

Santal rustic ◊

Tonka rustic ◊

Lys rustic ◊

Diamond rustic ∅

Pomerol rustic ∅

Graves rustic ∅

Elixir rustic ∅

Leognan rustic ∅

Sémillon rustic ∅

✧ LACQUERED FINISH

∅ OILED FINISH

more information see pages 38- 39

## STEP 2: CHOOSE THE SIZE

Cabbani is available in 3 board sizes. Short, narrow, long, wide...  
Base your choice on the size and shape of the room. For larger areas, the best choice is **DESIGNER**, a long, wide board. For smaller rooms we recommend a narrower board such as **PREMIER** or **ELITE**. These automatically make the room look bigger.

### PREMIER

1190 x 150 mm

Available with a top layer of 2 or 3.2 mm

### ELITE

1940 x 150 mm

Available with a top layer of 2, 3.2 or 5.5 mm

### DESIGNER

1940 x 194 mm

Available with a top layer of 2, 3.2 or 5.5 mm

## STEP 3: CHOOSE THE STYLE

This is where your personal taste comes first. Do you like it neat or do you prefer a more raw and rustic look? Depending the chosen color and board size you have the choice between two styles: Select or Rustic.

**Select** is only possible in the collections 01 and 02. **Rustic** is available in all collections. For the PREMIER board size in collections 01 and 02 you can chose between 'Rustic Light' and 'Rustic Intense', with more or less visible knots. For the long boards (ELITE and DESIGNER) no need because the rustic aspect is less pronounced and the special color effects are dominating in collections 03, 04 en 05.

	PREMIER	ELITE	DESIGNER
Collection 01	Select / Rustic (Light or Intense)	Select / Rustic	Select / Rustic
Collection 02	Select / Rustic (Light or Intense)	Select / Rustic	Select / Rustic
Collection 03	Rustic	Rustic	Rustic
Collection 04	Rustic	Rustic	Rustic
Collection 05	Rustic	Rustic	Rustic

### Select

A beautiful and balanced mix of textures and tonalities that highlight the typical characteristics of real wood, but without conspicuous knots. For Select, only the best oak wood is used.

### Rustic

The knots in the wood provide a rustic, aged look. Like burl and grain, they are not flaws in the wood but purely natural characteristics that reveal its history.

Rustic Light

Rustic Intense

## STEP 4: CHOOSE THE THICKNESS

Cabbani offers a choice of various top layer thicknesses.

Top layers are available in 2.0 mm, 3.2 mm and 5.5 mm. The thicker the top layer, the more solid the look. The thickness of the top layer contributes to the lifespan:

- a 2 mm top layer can be resanded once
- a 3.2 mm top layer can be resanded twice
- a 5.5 mm top layer can be resanded three times.

The respective board thicknesses are 10, 14 or 19 mm. The thicker the board, the better the acoustic insulation. For renovation projects, choose the board thickness that fits best with the thickness of the existing retained floors.

## STEP 5: CHOOSE THE CORE

**HDF** or High Density Fibreboard consists of wood chips pressed together under high pressure. This produces a remarkably good quality panel that is extremely resistant against heavy loading. The intense compression also removes any possible tension from the wood. The strong and hard core makes HDF an excellent base for parquet floors.

**BIRCH PLYWOOD:** Thin layers of birch wood are bonded to each other crosswise with waterproof adhesive to form a strong core with optimal properties. This leads to an exceptionally dimensionally-stable core that also conducts heat very well, making a birch plywood core ideal for parquet to be installed with underfloor heating.

## PREMIER

1190 x 150 mm  
(46.9" x 5.9")

## ELITE

1940 x 150 mm  
(76.4" x 5.9")

# HOW TO FINISH YOUR FLOOR AND KEEP IT IN PERFECT SHAPE

## INTELLIGENT ACCESSORIES FOR A PERFECT FINISH

PREMIER 10H - Umber Select

### 1 SKIRTINGS

Cabbani skirting boards are available in 26 colours. The skirting boards are 8 cm (3") high, but can just as easily be shortened to 6 (2.4") or even 2.5 cm (1") in no time. The notches make it possible to place the skirting boards neatly and straight up to the desired height.

**Skirting dimensions: 2150 x 80 x 14 mm (84.6" x 3.2" x 0.5")**

1 skirting, 3 heights

### 2 PROFILES

Profiles are intended to create an elegant transition or to take up height differences. Our useful profiles can be used for 3 applications: as an end profile, adjustment profile or transition profile.

**Profile dimensions: 2150 x 47 x 11 mm (84.6" x 1.9" x 0.4")**

1 profile, 3 applications

### 3 TREAD NOSING

Cabbani parquet can also be used to finish stairs. We have developed solid tread nosing specifically for this application in all 26 colours from our product range.

**Dimensions:**

**2400 x 60 x 10, 14 or 18.5mm options**

(94.5" x 2.4" x 3/8", 1/2" or 3/4" options)

### 4 SUBFLOORS

Cabbani parquet is usually glued down. However, if you do choose a floating installation, the parquet can easily be placed on a subfloor. In this case, only the tongue and the groove are glued to each other. Subfloors are primarily intended to provide a moisture barrier or noise muffling function. They are also able to conceal minor irregularities on the substrate.

- **NOISE DAMPING SUBFLOOR:** This 3.6 mm Cabbani subfloor with an aluminium layer on one side muffles reflected noise and conceals minor irregularities in the sublayer. Always put the aluminium side up and seal the edges of the strips tightly with Cabbani waterproof tape. This prevents moisture from the substrate from damaging the wooden floor.

- **STANDARD SUBFLOOR:** Our standard subfloor is 2 mm thick and consists of foam and plastic. The integrated plastic prevents damage to the wooden floor caused by moisture from the substrate. The edges of the strips also need to be affixed to each other tightly with Cabbani waterproof tape.

**WATERPROOF TAPE:** It is vital to protect your wooden floor from rising moisture. We strongly recommend only using our own, thoroughly tested waterproof tape to affix Cabbani subfloors to each other. This is the only way to guarantee adequate protection against moisture.

## KEEP YOUR FLOOR IN GOOD CONDITION

### MAINTAINING FLOORS WITH OILED FINISH

The oil we apply to our floors contains natural pigments and oils that may only be treated with our Cabbani maintenance and cleaning products.

For daily maintenance and long-lasting protection of your oiled floor, it is best to use a soft broom or vacuum cleaner, followed by cleaning with 'Cabbani parquet soap'. To thoroughly refresh a dulled parquet and bring back its silky lustre, it is best to use 'Cabbani maintenance oil' in concentrated form.

If your floor looks dull due to trodden-in and caked-on dirt, 'Cabbani intensive cleaner' is the solution. This provides a deep cleaning that also removes some oil, which is why it is necessary to treat with 'Cabbani maintenance oil' in concentrated form afterward.

If you have underfloor heating, 'Cabbani maintenance oil' must be applied at least twice per year to nourish the wood adequately.

You can read our full maintenance instructions at [www.cabbani.com/en/downloads](http://www.cabbani.com/en/downloads).

### MAINTAINING FLOORS WITH LACQUERED FINISH

It is important to avoid damaging the varnish when cleaning Cabbani floors with a varnish finish. That is why we recommend using our 'Cabbani cleaner'. This has been specially developed to remove dirt safely while protecting the wood.

'Cabbani cleaner' is available in a ready-to-use spray or as a concentrated cleaner that needs to be diluted with water.
